

## Year 4 Home Learning Week 2

Hi Everyone!

You may or may not have been working your way through the home learning pack that was sent home with you during our last week in school. There was plenty in there to keep you going for a while but in case you need a bit more there are some ideas below. Don't forget, these tasks are **optional** and you may need an adult to help you with some of them.

### English

Reading - I can see that some of you have been having a go at the books that have been allocated to you on Bug Club, so well done and keep that up! There are some great books on there!

Writing & Grammar - I like the look of the home learning packs produced by Hamilton trust and thought you might like to have a go at some of the activities. The links to them are on our Year 4 home learning page.

### Maths

Keep using Times Table Rock Stars to practise the times tables. Remember, we need to know them all. Also have a go at the maths games on Purple Mash if you can.

You will enjoy the new maths activities that I've set for you and they have all the explanations you need to be able to have a go at the task. Try them out.

### Science

In science we had started to learn about solids, liquids and gases. Look around your home and try to identify any solids, liquids and gases that you can find. Make a list of these in your green book (or any other notebook).

**Art** - just because we aren't currently in school doesn't mean you can make a decorated egg! Have a look at the info on the school website about the competition and get busy!!

Stay safe,

Mrs Russell 😊
