

Year 4 Home Learning Week 11

Hi Year 4!

Well, the weather has been kind again for much of the week, with some really hot days this week. This week doesn't look like being too good though as there's plenty of rain forecast 😞 This might be a good week to continue with your home learning, so carry on using the **Oak National Academy** online lessons which will be continuing. This week, is Week 11 (29th June):

- As usual there will be maths and English lessons, plus a range of history, geography, science and PSHE.
- Don't forget, there's also PE with Jo Wicks each day, as well as the PE suggestions provided weekly by the West Lancs Sports Partnership.
- The Oak Academy also has a weekly assembly that you could tune into from Thursday at 11am.
- There is also a section of Activity Clubs that you could join. There's loads of stuff on there, from art, cooking, sports, Scouts and plenty more. Have a go if you can.

I have added some more 2do's on **Purple Mash**. There are some maths activities on rounding, Roman Numerals and comparing fractions. For your English work this week you could write some film reviews about films you have watched and create a comic strip. There is also a 2do to create a weather report for where you live.

If you haven't tried it yet, have a look at **Explorify** (<https://explorify.wellcome.ac.uk/>). It's a website that's totally about science which you'll find really interesting and it's free to sign up!

The **Bug Club** online reading books will remain available for you to use, as will **Times Table Rock Stars**.

And remember, your health and wellbeing are the most important thing. Get outside when you can (hopefully the weather will be ok, you can tell me in your weather report) and try to stay active. The school website has lots of links to ideas that can help with this.

Take care and stay safe,

Mrs Russell 😊
